

TECHNICAL DATA SHEET

UV THINNER

Gerko's UV Thinner is a thinner specially formulated to achieve high viscosity reductions, it promotes better flow and prevents blisters. Balanced evaporation ensures a perfect base and topcoat.

COMPOSITION

Ketone based solvents

TREATMENT

For primers polymerizing with UV rays. Depending on the required viscosity, thin 5 to 10%.

PHYSICAL PROPERTIES

Code	Description	Specific weight	Colour	Pieces per box	Boxes per pallet
UVT10	UV Thinner	0,8 ± 0,02 gr/cm ³	Colourless	6	40

PRECAUTIONARY MEASURES

Use at room temperature
